## Introduction

Dubai Exports is constantly identifying services that equip its exporters to be more competitive in the global market. Our range of services to exporters fall broadly under the following model:

Dubai Exports plays a pivotal role in the enhancement of the trading environment for its business community. An ongoing government dialogue and joint initiatives with local, federal and International Partners ensures we make business easy for the exporters. Some initiatives include:

- Lead/support UAE & Dubai Government in trade policy & initiatives, including the Annual Exporter Awards
- International government collaboration across The Middle East, Asia, Europe and the Americas
- Trade development strategies in co-operation with International Trade Center (ITC), United Nations (UNCTAD) entities and World Trade Organization (WTO)
- Resolution of trade issues through advocacy with the UAE Local & Federal government

ITC in 2015, launched a new tool – **ITC Procurement Map** (<http://procurementmap.intracen.org/>) – with a view to help businesses, especially small and medium-sized enterprises, navigate the myriad of opportunities to bid for public procurement contracts around the world. Procurement Map was unveiled by ITC Executive Director Arancha González in 2015. **ITC Procurement Map** –includes a country-by-country breakdown of more than 100,000 public tenders, with information updated on a real time basis. This tool offers a route to foster entrepreneurship and to seek new market opportunities. Users can easily identify potential buyers thanks to an intuitive search based on target country and economic sector. Drawing from this tool, we at Dubai Exports are compiling a list of country specific tenders which we believe will be useful to our members interested in expanding their business. DE Members who wish to know more on any specific entry may contact us at [rsvp@dedc.gov.ae](mailto:rsvp@dedc.gov.ae) and we shall make every attempt to obtain detailed information for the queries. A sample of typical information available per entry in the attached table is given on the next page.
